

Notice of

King Mongkut's University of Technology Thonburi:

The surveillance of COVID-19 outbreak

No. 70 on July 25, 2021

On July 25, 2021, the University was reported 10 COVID-19 confirmed cases as follows:

The first case is a female undergraduate student from the Department of Mathematics, Faculty of Science **(the 125th case of KMUTT)**. Currently, she is in the care of the Public Health Agency and is receiving medical treatment at home (Home Isolation Program). The student entered the University premises (KMUTT Bangmod Campus) only on June 14, 2021. She wore a face mask all the time and wasn't in close contact with other students or staff. Except for that day, she hadn't entered the University premises (KMUTT Bangmod Campus) and hadn't done any activities with other students or staff since June. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The second case is a female undergraduate student from the Mechatronics Engineering Program, Faculty of Engineering **(the 126th case of KMUTT)**. Currently, she is in the care of the Public Health Agency and is receiving medical treatment at home (Home Isolation Program). The student entered the University premises (KMUTT Bangmod Campus) only on June 28, 2021 in the afternoon. She wore a face mask all the time and wasn't in close contact with other students or staff. Except for that day, she hadn't entered the University premises (KMUTT Bangmod Campus) and hadn't done any activities with other students or staff since June. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The third case is a male undergraduate student from the Mechatronics Engineering Program, Faculty of Engineering **(the 127th case of KMUTT)**. Currently, he is in the care of the relevant government agencies and is waiting to be transferred to hospital for treatment. The student entered the University premises (KMUTT Bangmod Campus) only on June 30, 2021 in the afternoon. He wore a face mask all the time and wasn't in close contact with other students or staff. Except for that day, he hadn't entered the University premises (KMUTT Bangmod Campus) and hadn't done any activities with other students or staff since June. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The fourth case is a male undergraduate student from the Institute of Field Robotics **(the 128th case of KMUTT)**. Currently, he is in the care of a hospital and is receiving medical treatment at home (Home Isolation Program). The student reported that he hasn't entered the University premises (KMUTT Bangmod Campus) and hasn't done any activities with other students or staff since June. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The fifth case is a female undergraduate student from the Department of Printing and Packaging Technology, Faculty of Industrial Education and Technology **(the 129th case of KMUTT)**. She was in a private hospital for treatment. Now, she has recovered. The student reported that she hasn't entered the University premises (KMUTT Bangmod Campus) and hasn't done any activities with other students or staff since June. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The sixth case is a male undergraduate student from the Department of Electrical Technology Education, Faculty of Industrial Education and Technology **(the 130th case of KMUTT)**. Currently, he is in the care of the relevant government agencies and is waiting to be transferred to hospital for treatment. The student reported that he hasn't entered the University premises (KMUTT Bangmod Campus) and hasn't done any activities with other students or staff since June. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The seventh case is a female undergraduate student from the Department of Electrical Technology Education, Faculty of Industrial Education and Technology **(the 131st case of KMUTT)**. Currently, she is in the care of the relevant government agencies and is waiting to be transferred to hospital for treatment. The student reported that she hasn't entered the University premises (KMUTT Bangmod Campus) and hasn't done any activities with other students or staff since June. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The eighth case is a female master's student from the School of Information Technology **(the 132nd case of KMUTT)**. Currently, she is in a government hospital for treatment. The student reported that she hasn't entered the University premises (KMUTT Bangmod Campus) and hasn't done any activities with other students or staff since June. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The ninth case is a female undergraduate student from the Department of Educational Communications and Technology, Faculty of Industrial Education and Technology **(the 133rd case of KMUTT)**. Currently, she is in the care of the relevant government agencies and is waiting to be transferred to hospital for treatment. The student reported that she hasn't entered the University premises (KMUTT Bangmod Campus) and hasn't done any activities with other students or staff since June. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The tenth case is a female undergraduate student from the Department of Production Technology Education, Faculty of Industrial Education and Technology **(the 134th case of KMUTT)**. Currently, she is in the care of the Public Health Agency and is receiving medical treatment at home (Home Isolation Program). The student entered the University premises (KMUTT Bangmod Campus) only on June 21, 2021 in the morning. She wore a face mask all the time and wasn't in close contact with other students or staff. Except for that day, she hadn't entered the University premises (KMUTT Bangmod Campus) and hadn't done any activities with other students or staff since June. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

Announced on July 25, 2021 at 12.00 hrs.

Should there be any update on the situation, the University will further announce it via <https://covid-19.kmutt.ac.th>
