## King Mongkut's University of Technology Thonburi:

### The surveillance of COVID-19 outbreak

#### No. 73 on July 28, 2021

On July 28, 2021, the University was reported 7 COVID-19 confirmed cases as follow

The first case is a female undergraduate student from the Department of Environmental Engineering, Faculty of Engineering **(the 151<sup>st</sup> case of KMUTT)**. Currently, she is in the care of the relevant government agencies and is waiting to be transferred to hospital for treatment. The student reported that she hasn't entered the University premises (KMUTT Bangmod Campus) and hasn't done any activities with other students or staff since June. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The second case is a female undergraduate student from the Department of Production Technology Education, Faculty of Industrial Education and Technology **(the 152<sup>nd</sup> case of KMUTT)**. Currently, she is undergoing the Home Isolation Program under the care of the relevant government agencies. The student reported that she hasn't entered the University premises (KMUTT Bangmod Campus) and hasn't done any activities with other students or staff since June. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The third case is a female undergraduate student from the Department of Production Technology Education, Faculty of Industrial Education and Technology **(the 153<sup>rd</sup> case of KMUTT)**. Currently, she is in the care of the relevant government agencies and is undergoing the Home Isolation Program. The student reported that she hasn't entered the University premises (KMUTT Bangmod Campus) and hasn't done any activities with other students or staff since June. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The fourth case is a female Grade 12 student of the SCiU Program, Darunsikkhalai School for Innovative Learning (DSIL) **(the 154<sup>th</sup> case of KMUTT)**. Currently, she is in a government hospital for treatment. The student has neither visited DSIL nor KMUTT (Bang Khun Thian Campus), and hasn't done any activities with other students or staff since June. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The fifth case is a female Grade 12 student of the SCiU Program, Darunsikkhalai School for Innovative Learning (DSIL) **(the 155<sup>th</sup> case of KMUTT)**. Currently, she is in the care of the relevant government agencies and is receiving the medical treatment at home (Home Isolation Program). The student has neither visited DSIL nor KMUTT (Bang Khun Thian Campus), and hasn't done any activities with other students or staff since June. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The sixth case is a female undergraduate student from the Department of Microbiology, Faculty of Science **(the 156<sup>th</sup> case of KMUTT)**. Currently, she is in a government hospital for treatment. The student reported that she hasn't visited the University and hasn't done any activities with other students or staff since June. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The seventh case is a male undergraduate student of the Department of Control System and Instrumentation Engineering, Faculty of Engineering **(the 157<sup>th</sup> case of KMUTT)**. Currently, he is in a government hospital for treatment. The student reported that he hasn't visited the University and hasn't done any activities with other students or staff since June. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

Announced on July 28, 2021 at 12.00 hrs.

Should there be any update on the situation, the University will further announce it via <https://covid-19.kmutt.ac.th>
