## King Mongkut's University of Technology Thonburi:

### The surveillance of COVID-19 outbreak

#### No. 96 on August 20, 2021

On August 20, 2021, the University was reported 7 COVID-19 confirmed cases as follows:

The first case is a female staff member of the Department of Computer Engineering, Faculty of Engineering **(the 329<sup>th</sup> case of KMUTT)**. She has already contacted the relevant government agencies, and is currently waiting for further response regarding her treatment program. The staff reported that she entered the University premises (KMUTT Bangmod Campus) only on August 5, 2021. She wore a facemask all the time and wasn't in close contact with other students or staff. The related units are currently investigating to identify people whom the infected staff might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The second case is a female undergraduate student from the Department of Printing and Packaging Technology, Faculty of Industrial Education and Technology **(the 330<sup>th</sup> case of KMUTT)**. The student reported that she has fully recovered from COVID-19 after receiving medical treatment at home (Home Isolation Program). The student reported that she hasn't entered the University premises (KMUTT Bangmod Campus) and hasn't done any activities with other students or staff since June. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The third case is a female undergraduate student from the Department of Educational Communications and Technology, Faculty of Industrial Education and Technology **(the 331<sup>st</sup> case of KMUTT)**. Currently, she is in a hospital for treatment. The student reported that she hasn't entered the University premises (KMUTT Bangmod Campus) and hasn't done any activities with other students or staff since June. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The fourth case is a female undergraduate student from the Department of Educational Communications and Technology, Faculty of Industrial Education and Technology **(the 332<sup>nd</sup> case of KMUTT)**. Currently, she is in a hospital for treatment. The student reported that she hasn't entered the University premises (KMUTT Bangmod Campus) and hasn't done any activities with other students or staff since June. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The fifth case is a female undergraduate student from the Department of Educational Communications and Technology, Faculty of Industrial Education and Technology (**the 333<sup>rd</sup> case of KMUTT**). Currently, she is undergoing the Home Isolation Program. The student entered the University premises (KMUTT Bangmod Campus) only on June 30, 2021. She wore a facemask all the time and wasn't in close contact with other students or staff. Except for that day, she hadn't entered the University premises (KMUTT Bangmod Campus) and hadn't done any activities with other students or staff since June. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The sixth case is a female undergraduate student from the Department of Educational Communications and Technology, Faculty of Industrial Education and Technology (**the 334<sup>th</sup> case of KMUTT**). Currently, she is in a hospitel for treatment. The student reported that she hasn't entered the University premises (KMUTT Bangmod Campus) and hasn't done any activities with other students or staff since June. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The seventh case is a male master's student from the Biological Engineering Program, Faculty of Engineering (**the 335<sup>th</sup> case of KMUTT**). Currently, he is in a government hospital for treatment. The student entered the University premises (KMUTT Bangmod Campus) only on June 15, 2021. He wore a face mask all the time and wasn't in close contact with other students or staff. Except for that day, he hadn't visited the University and hadn't done any activities with other students or staff since June. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

Announced on August 20, 2021 at 12.00 hrs.

Should there be any update on the situation, the University will further announce it via <https://covid-19.kmutt.ac.th>
