

Notice of

King Mongkut's University of Technology Thonburi:

The surveillance of COVID-19 outbreak

No. 98 on August 22, 2021

On August 22, 2021, the University was reported 9 COVID-19 confirmed cases as follows:

The first case is a female undergraduate student from the Department of Control System and Instrumentation Engineering, Faculty of Engineering **(the 341st case of KMUTT)**. Currently, she is undergoing the Home Isolation Program. The student reported that she hasn't entered the University premises (KMUTT Bangmod Campus) and hasn't done any activities with other students or staff since June. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The second case is a male undergraduate student from the Department of Production Technology Education, Faculty of Industrial Education and Technology **(the 342nd case of KMUTT)**. Currently, he is in a private hospital for treatment. The student reported that he hasn't entered the University premises (KMUTT Bangmod Campus) and hasn't done any activities with other students or staff. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The third case is a male undergraduate student from the Department of Mathematics, Faculty of Science **(the 343rd case of KMUTT)**. Currently, he is undergoing the Home Isolation Program. The student entered the University premises (KMUTT Bangmod Campus) only on June 7, 2021. He wore a face mask all the time and wasn't in close contact with other students or staff. Except for that day, he hadn't visited the University and hadn't done any activities with other students or staff since June. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The fourth case is a male undergraduate student from the Department of Educational Communications and Technology, Faculty of Industrial Education and Technology **(the 344th case of KMUTT)**. He is currently waiting to be transferred to the hospital for treatment. The student entered the University premises (KMUTT Bangmod Campus) only on June 29, 2021. He wore a face mask all the time and wasn't in close contact with other students or staff. Except for that day, he hadn't visited the University and hadn't done any activities with other students or staff since June. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The fifth case is a male undergraduate student from the Department of Mechanical Engineering, Faculty of Engineering **(the 345th case of KMUTT)**. Currently, he is in a hospital for treatment. The student entered the University premises (KMUTT Bangmod Campus) only on June 29, 2021. He wore a face mask all the time and wasn't in close contact with other students or staff. Except for that day, he hadn't visited the University and hadn't done any activities with other students or staff since June. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The sixth case is a female undergraduate student from the Department of Mathematics, Faculty of Science **(the 346th case of KMUTT)**. The student reported that she has fully recovered from COVID-19 after receiving treatment in a Hospital. The student reported that she hasn't entered the University premises (KMUTT Bangmod Campus) and hasn't done any activities with other students or staff since June. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The seventh case is a male undergraduate student from the Department of Production Technology Education, Faculty of Industrial Education and Technology **(the 347th case of KMUTT)**. The student reported that he has fully recovered from COVID-19 after being hospitalized for treatment in the government hospital. The student entered the University premises (KMUTT

Bangmod Campus) only on June 21, 2021. He wore a face mask all the time and wasn't in close contact with other students or staff. Except for that day, he hadn't visited the University and hadn't done any activities with other students or staff since June. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The eighth case is a male undergraduate student from the Department of Production Engineering, Faculty of Engineering **(the 348th case of KMUTT)**. Currently, he is undergoing the Home Isolation Program. The student entered the University premises (KMUTT Bangmod Campus) only on June 15, 2021. He wore a face mask all the time and wasn't in close contact with other students or staff. Except for that day, he hadn't visited the University and hadn't done any activities with other students or staff since June. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The ninth case is a female cleaning staff who works in the Scientific Instrument Center Building **(the 349th case of KMUTT)**. Currently, she is in a government hospital for treatment. The staff reported that the last day she was at work is August 15, 2021. The related units are currently investigating to identify people whom the infected staff might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

Announced on August 22, 2021 at 12.00 hrs.

Should there be any update on the situation, the University will further announce it via <https://covid-19.kmutt.ac.th>
