## King Mongkut's University of Technology Thonburi:

### The surveillance of COVID-19 outbreak

#### No. 110 on September 4, 2021

On September 4, 2021, the University was reported 8 COVID-19 confirmed cases as follows:

The first case is a female undergraduate student from the Department of Computer Engineering, Faculty of Engineering **(the 397<sup>th</sup> case of KMUTT)**. Currently, she is undergoing the Home Isolation Program. The student reported that she hasn't entered the University premises (KMUTT Bangmod Campus) and hasn't done any activities with other students or staff since July. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The second case is a male undergraduate student from the Department of Chemical Engineering, Faculty of Engineering **(the 398<sup>th</sup> case of KMUTT)**. The student reported that he has fully recovered from COVID-19 after receiving treatment in a hospital. The student reported that he hasn't entered the University premises (KMUTT Bangmod Campus) and hasn't done any activities with other students or staff since July. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The third case is a female undergraduate student from the Department of Educational Communications and Technology, Faculty of Industrial Education and Technology **(the 399<sup>th</sup> case of KMUTT)**. She is currently waiting to be transferred to the hospital for treatment. The student reported that she hasn't entered the University premises (KMUTT Bangmod Campus) and hasn't done any activities with other students or staff since July. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The fourth case is a female undergraduate student from the Department of Civil Technology Education, Faculty of Industrial Education and Technology **(the 400<sup>th</sup> case of KMUTT)**. Currently, she is in a hospital for treatment. The student reported that she hasn't entered the University premises (KMUTT Bangmod Campus) and hasn't done any activities with other students or staff since July. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The fifth case is a male undergraduate student from the Department of Electrical Technology Education, Faculty of Industrial Education and Technology **(the 401<sup>st</sup> case of KMUTT)**. Currently, he is in a private hospital for treatment. The student reported that he hasn't entered the University premises (KMUTT Bangmod Campus) and hasn't done any activities with other students or staff since July. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The sixth case is a female undergraduate student from the Department of Mechanical Engineering, Faculty of Engineering **(the 402<sup>nd</sup> case of KMUTT)**. Currently, she is in a government hospital for treatment. The student reported that she hasn't entered the University premises (KMUTT Bangmod Campus) and hasn't done any activities with other students and staff since July. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The seventh case is a female master's student from the Department of Computer Engineering, Faculty of Engineering **(the 403<sup>rd</sup> case of KMUTT)**. Currently, she is undergoing the Home Isolation Program. The student reported that she hasn't entered the University premises (KMUTT Bangmod Campus) and hasn't done any activities with other students or staff since July. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The eighth case is a female undergraduate student from the Department of Electronic and Telecommunication Engineering, Faculty of Engineering **(the 404<sup>th</sup> case of KMUTT)**. The student reported that she has fully recovered from COVID-19 after receiving treatment in a hospital. The student reported that she hasn't entered the University premises (KMUTT Bangmod Campus) and hasn't done any activities with other students or staff since July. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

Announced on September 4, 2021 at 12.00 hrs.

Should there be any update on the situation, the University will further announce it via <https://covid-19.kmutt.ac.th>
