## King Mongkut's University of Technology Thonburi:

### The surveillance of COVID-19 outbreak

#### No. 189 on January 18, 2022

On January 18, 2022, the University was reported 12 COVID-19 confirmed cases as follows:

The first case is a female undergraduate student from the Department of Mathematics, Faculty of Science **(the 627<sup>th</sup> case of KMUTT)**. Currently, she is undergoing the Home Isolation Program. The student entered the University premises (KMUTT Bangmod Campus) on January 11, 2022. She kept physical distancing and wore a face mask all the time while visiting the university premises. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The second case is a male undergraduate student from the Department of Production Engineering, Faculty of Engineering **(the 628<sup>th</sup> case of KMUTT)**. Currently, he is in a hospital for treatment. The student entered the University premises (KMUTT Bangmod Campus) on January 10, 2022. He kept physical distancing and wore a face mask all the time while visiting the university premises. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The third case is a female undergraduate student from the Department of Electrical Technology Education, Faculty of Industrial Education and Technology **(the 629<sup>th</sup> case of KMUTT)**. She has already contacted the relevant government agencies, and is currently waiting for further response regarding her treatment program. The student entered the University premises (KMUTT Bangmod Campus) on January 12, 2022. She kept physical distancing and wore a face mask all the time while visiting the university premises. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The fourth case is a female undergraduate student from the Department of Electrical Technology Education, Faculty of Industrial Education and Technology **(the 630<sup>th</sup> case of KMUTT)**. Currently, she is in a hospital for treatment. The student entered the University premises (KMUTT Bangmod Campus) on January 12, 2022. She kept physical distancing and wore a face mask all the time while visiting the university premises. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The fifth case is a male undergraduate student from the Department of Mechanical Engineering, Faculty of Engineering **(the 631<sup>st</sup> case of KMUTT)**. The student reported that he has fully recovered from COVID-19 after being hospitalized for treatment in a hospital. The student reported that he hasn't entered the University premises (KMUTT Bangmod Campus) and hasn't done any activities with other students or staff since January 2022. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The sixth case is a male undergraduate student from the Department of Civil Engineering, Faculty of Engineering **(the 632<sup>nd</sup> case of KMUTT)**. The student reported that he has fully recovered from COVID-19 after being hospitalized for treatment in a hospital. The student reported that he hasn't entered the University premises (KMUTT Bangmod Campus) and hasn't done any activities with other students or staff since January 2022. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The seventh case is a female undergraduate student from the Department of Mechanical Engineering, Faculty of Engineering **(the 633<sup>rd</sup> case of KMUTT)**. Currently, she is undergoing the Home Isolation Program. The student reported that she hasn't entered the University premises (KMUTT Bangmod Campus) and hasn't done any activities with other students or staff since January 2022. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The eighth case is a female undergraduate student from the Department of Production Engineering, Faculty of Engineering **(the 634<sup>th</sup> case of KMUTT)**. Currently, she is in a hospital for treatment. The student reported that she hasn't entered the University premises (KMUTT Bangmod Campus) and hasn't done any activities with other students or staff since January 2022. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The ninth case is a female master's student from the Graduate School of Management and Innovation **(the 635<sup>th</sup> case of KMUTT)**. Currently, she is in a government hospital for treatment. The student reported that she hasn't entered the University premises (KMUTT Bangmod Campus) and hasn't done any activities with other students or staff since January 2022. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The tenth case is a male master's student from the Department of Tool and Materials Engineering, Faculty of Engineering (**the 636<sup>th</sup> case of KMUTT**). Currently, he is in a hospital for treatment. The student reported that he hasn't entered the University premises (KMUTT Bangmod Campus) and hasn't done any activities with other students or staff since January 2022. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The eleventh case is a female PhD student from the Faculty of Engineering (**the 637<sup>th</sup> case of KMUTT**). The student reported that she has fully recovered from COVID-19 after being hospitalized for treatment in a hospital. The student reported that she hasn't entered the University premises (KMUTT Bangmod Campus) and hasn't done any activities with other students or staff since January 2022. The student also informed that she had had meal with her friends. Her friends are informed to undergo self-quarantine to monitor their symptoms for 14 days. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The twelfth case is a female undergraduate student from the Department of Mathematics, Faculty of Science (**the 638<sup>th</sup> case of KMUTT**). Currently, she is in a hospital for treatment. The student entered the University premises (KMUTT Bangmod Campus) on January 12, 2022. She kept physical distancing and wore a face mask all the time while visiting the university premises. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

Announced on January 18, 2022 at 12.00 hrs.

Should there be any update on the situation, the University will further announce it via <https://covid-19.kmutt.ac.th>
