

Notice of

King Mongkut's University of Technology Thonburi:

The surveillance of COVID-19 outbreak

No. 192 on January 21, 2022

On January 21, 2022, the University was reported 24 COVID-19 confirmed cases as follows:

The first case is a male undergraduate student from the Department of Printing and Packaging Technology, Faculty of Industrial Education and Technology (**the 666th case of KMUTT**). Currently, he is in a hospital for treatment. The student entered the University premises (KMUTT Bangmod Campus) on January 10, 2022. He kept physical distancing and wore a face mask all the time while visiting the university premises. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The second case is a male undergraduate student from the Department of Mechanical Engineering, Faculty of Engineering (**the 667th case of KMUTT**). Currently, he is undergoing the Home Isolation Program. The student reported that he hasn't entered the University premises (KMUTT Bangmod Campus) since January 2022. The student also reported that he had met his friends to have meal and had travelled together. His at-risk friends are informed to undergo self-quarantine to monitor their symptoms for 14 days. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The third case is a male undergraduate student from the Digital Service Innovation Program, School of Information Technology (**the 668th case of KMUTT**). Currently, he is in a hospital for treatment. The student reported that he hasn't entered the University premises (KMUTT Bangmod Campus) since January 2022. The student also reported that he had met his friends to have meal and had travelled together. His at-risk friends are informed to undergo self-quarantine to monitor their symptoms for 14 days. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The fourth case is a male undergraduate student from the Department of Production Engineering, Faculty of Engineering (**the 669th case of KMUTT**). Currently, he is in a hospital for treatment. The student reported that he hasn't entered the University premises (KMUTT Bangmod Campus) since January 2022. The student also reported that he had met his friends to have meal and had travelled together. His at-risk friends are informed to undergo self-quarantine to monitor their symptoms for 14 days. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The fifth case is a male undergraduate student from the Department of Electrical Technology Education, Faculty of Industrial Education and Technology **(the 670th case of KMUTT)**. Currently, he is in a hospital for treatment. The student reported that he hasn't entered the University premises (KMUTT Bangmod Campus) since January 2022. The student also reported that he had met his friends to have meal and had travelled together. His at-risk friends are informed to undergo self-quarantine to monitor their symptoms for 14 days. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The sixth case is a male undergraduate student from the Institute of Field Robotics **(the 671st case of KMUTT)**. Currently, he is in a hospital for treatment. The student reported that he hasn't entered the University premises (KMUTT Bangmod Campus) since January 2022. The student also reported that he had met his friends to have meal and had travelled together. His at-risk friends are informed to undergo self-quarantine to monitor their symptoms for 14 days. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The seventh case is a male undergraduate student from the Department of Electrical Technology Education, Faculty of Industrial Education and Technology **(the 672nd case of KMUTT)**. Currently, he is in a hospital for treatment. The student reported that he hasn't entered the University premises (KMUTT Bangmod Campus) since January 2022. The student also reported that he had met his friends to have meal and had travelled together. His at-risk friends are informed to undergo self-quarantine to monitor their symptoms for 14 days. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The eighth case is a male undergraduate student from the Department of Electronic and Telecommunication Engineering, Faculty of Engineering **(the 673rd case of KMUTT)**. Currently, he is in a hospital for treatment. The student reported that he hasn't entered the University premises (KMUTT Bangmod Campus) since January 2022. The student also reported that he had met his friends to have meal and had travelled together. His at-risk friends are informed to undergo self-quarantine to monitor their symptoms for 14 days. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The ninth case is a female undergraduate student from the Department of Microbiology, Faculty of Science **(the 674th case of KMUTT)**. Currently, she is in a hospital for treatment. The student reported that she hasn't entered the University premises (KMUTT Bangmod Campus) since January 2022. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The tenth case is a male undergraduate student from the Department of Electronic and Telecommunication Engineering, Faculty of Engineering **(the 675th case of KMUTT)**. Currently, he is in a hospital for treatment. The student reported that he hasn't entered the University premises (KMUTT Bangmod Campus) since January 2022. The student also reported that he had met his friends to have meal and had travelled together. His at-risk friends are informed to undergo self-quarantine to monitor their symptoms for 14 days. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The eleventh case is a male undergraduate student from the Department of Mechanical Engineering, Faculty of Engineering **(the 676th case of KMUTT)**. The student reported that he has fully recovered from COVID-19 after undergoing Home Isolation Program. The student reported that he hasn't entered the University premises (KMUTT Bangmod Campus) and hasn't done any activities with other students or staff since January 2022. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The twelfth case is a female undergraduate student from the Department of Chemistry, Faculty of Science **(the 677th case of KMUTT)**. Currently, she is in a hospital for treatment. The student entered the University premises (KMUTT Bangmod Campus) on January 18, 2022 in the morning to conduct her research project at the laboratory of the Fundamental Science Laboratory Building on the 7th and 5th floor. Her at-risk classmates are informed to undergo self-quarantine to monitor their symptoms for 14 days. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The thirteenth case is a male undergraduate student from the Department of Electronic and Telecommunication Engineering, Faculty of Engineering **(the 678th case of KMUTT)**. Currently, he is in a hospital for treatment. The student reported that he hasn't entered the University premises (KMUTT Bangmod Campus) and hasn't done any activities with other students or staff since January 2022. The student also reported that he had met his friends to have meal and had travelled together. His at-risk friends are informed to undergo self-quarantine to monitor their symptoms for 14 days. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The fourteenth case is a female undergraduate student from the Joint Management Program, Media Arts and Media Technology, School of Architecture and Design **(the 679th case of KMUTT)**. Currently, he is in a hospital for treatment. The student reported that she hasn't entered the University premises (KMUTT Bangmod Campus and KMUTT Bang Khun Thian Campus) and hasn't done any activities with other students or staff since January 2022. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The fifteenth case is a male undergraduate student from the Department of Electronic and Telecommunication Engineering, Faculty of Engineering **(the 680th case of KMUTT)**. Currently, he is in a private hospital for treatment. The student reported that he hasn't entered the University premises (KMUTT Bangmod Campus) and hasn't done any activities with other students or staff since January 2022. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The sixteenth case is a female undergraduate student from the Information Technology Program, School of Information Technology **(the 681st case of KMUTT)**. Currently, she is in a private hospital for treatment. The student reported that she hasn't entered the University premises (KMUTT Bangmod Campus) since January 2022. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The seventeenth case is a male undergraduate student from the Department of Electrical Technology Education, Faculty of Industrial Education and Technology **(the 682nd case of KMUTT)**. Currently, he is in a hospital for treatment. The student reported that he hasn't entered the University premises (KMUTT Bangmod Campus) since January 2022. The student also reported that he had met his friends to have meal and had travelled together. His at-risk friends are informed to undergo self-quarantine to monitor their symptoms for 14 days. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The eighteenth case is a male undergraduate student from the Department of Mechanical Engineering, Faculty of Engineering **(the 683rd case of KMUTT)**. Currently, he is in a private hospital for treatment. The student reported that he hasn't entered the University premises (KMUTT Bangmod Campus) since December 20, 2021. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The nineteenth case is a female undergraduate student from the Department of Civil Technology Education, Faculty of Industrial Education and Technology **(the 684th case of KMUTT)**. Currently, she is in a private hospital for treatment. The student reported that she hasn't entered the University premises (KMUTT Bangmod Campus and KMUTT Bang Khun Thain Campus) since January 2022. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The twentieth case is a male undergraduate student from the Department of Chemical Engineering, Faculty of Engineering **(the 685th case of KMUTT)**. Currently, she is in a private hospital for treatment. The student reported that she hasn't entered the University premises (KMUTT Bangmod Campus) since January 2022. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The twenty-first case is a female master's student from the Graduate School of Management and Innovation **(the 686th case of KMUTT)**. Currently, she is in a hospital for treatment. The student reported that she hasn't entered the University premises (KMUTT Bangmod Campus) since January 2022. The student also reported that she had met her friends to have meal and had travelled together. Her at-risk friends are informed to undergo self-quarantine to monitor their symptoms for 14 days. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The twenty-second case is a male undergraduate student from the Department of Civil Technology Education, Faculty of Industrial Education and Technology **(the 687th case of KMUTT)**. Currently, he is in a hospital for treatment. The student entered the University premises (KMUTT Bangmod Campus) on January 10, 2022. He kept physical distancing and wore a face mask all the time while visiting the university premises. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The twenty-third case is a female undergraduate student from the Department of Chemical Engineering, Faculty of Engineering **(the 688th case of KMUTT)**. Currently, she is in a hospital for treatment. The student reported that she hasn't entered the University premises (KMUTT Bangmod Campus) since January 2022. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

The twenty-fourth case is a male master's student from the School of Energy, Environment, and Materials **(the 689th case of KMUTT)**. Currently, he is in a hospital for treatment. The student reported that he hasn't entered the University premises (KMUTT Bangmod Campus) since December. The related units are currently investigating to identify people whom the infected student might be in close contact with to assess the level of risk and continue to operate the relevant practices according to the measures of the Department of Disease Control.

Announced on January 21, 2022 at 12.00 hrs.

Should there be any update on the situation, the University will further announce it via <https://covid-19.kmutt.ac.th>
